

ISO/IEC 27017 INFORMATION TECHNOLOGY — SECURITY TECHNIQUES

CODE OF PRACTICE FOR INFORMATION SECURITY CONTROLS

WHAT IS ISO/IEC 27017?

ISO/IEC 27017:2015 provides guidelines for information security controls applicable to the provision and use of cloud services by providing:

- Guidelines for implementing relevant controls specified in ISO/IEC 27002.
- Additional controls with implementation guidance for cloud service providers and customers.

WHO CAN APPLY FOR ISO/IEC 27017?

This certification is applicable to all types and sizes of organizations, including public and private companies, government entities and not-for-profit organizations, which provide information processing services as Personally identifiable information (PII) processors via cloud computing under contract to other organizations.

WHY IS ISO/IEC 27017 IMPORTANT?

In addition to protecting your reputation, ISO/IEC 27017 ensures that your customers and stakeholders' data, documents, messages, and activities are protected.

Reduces operational risk by analysing vulnerabilities and mitigate against data breaches, as well as regulatory fines and penalties.

Achieve a competitive advantage through ISO/IEC 27017 certification, which demonstrates your commitment to global information security practices and strong IT governance.

Establish and clarify responsibilities: ISO/IEC 27017 defines the specific relationship, roles, rights, and responsibilities between cloud service customers and cloud service providers, allowing you to expand your business globally as a preferred CSP.
