

Cyber Trust mark certification with GICG

GICG is a leading and internationally recognised Testing, Inspection and Certification (TIC) body with close to 30 years of experience in Information Security Management Systems and Risk Management Audits. Appointed by Cyber Security Agency of Singapore (CSA) as certification bodies for Cyber Trust mark certification, we help businesses like yours to validate and strengthen your commitment to cyber security.

With Cyber Trust mark certification, your business gains trust and fosters confidence among your customers and stakeholders as you demonstrate that you have adopted robust and accountable cyber security practices.

Cyber Trust mark

Demonstrate your commitment to good cyber practices and cyber security preparedness with third-party certification from GICG.

Digitalisation creates new opportunities, and COVID-19 has accelerated the rise of the digital economy. An increasing digital way of life also increases enterprises' and individuals' exposure to cyber risks. Cybersecurity is a critical enabler to Singapore's digital economy. There is a need to build confidence in enterprises to enable them to pursue the opportunities from digitalisation. Cybersecurity incidents often result in financial losses, tarnish business reputation and affect customers' trust, negating business investments and customers' confidence in the digital economy.

What is Cyber Trust Mark

The Cyber Trust mark is a cybersecurity certification for organisations with more extensive digitalised business operations. It serves as a mark of distinction for your organisation to prove that you have put in place good cybersecurity practices and measures that are commensurate with your cybersecurity risk profile. Cyber Trust provides a guided approach for organisation to access cybersecurity risks and preparedness. It also takes on a risk-based approach to meet your organisation needs without over-investing.

Certification process

The cybersecurity preparedness domains are organised in five (5) tiers to cater to the varying sizes, profiles and business needs of enterprises:

- ØSupporter
- ØPractitioner
- ØPromoter
- ØPerformer
- ØAdvocate

Interested businesses are encouraged to sign up for the certification programme. For more information on Cyber Trust mark, please contact us.
